Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by the WO published application to Hepp et al (WO 99/21064).
2. With respect to claims 1-3, Hepp et al disclose an electronic apparatus the operations of which are controlled electronically, said apparatus comprising main operating means CPU for performing a specified operation consistent with the usage and application of said electronic apparatus; main control means RAM for controlling said main operating means; display means including a main operation display area for demonstrating the operating state of said main operating means 3 and a moon image display area 8 for demonstrating a moon image consistent with the age of the moon; and display control means (Display Interface) for demonstrating the operation of said main operating means, output from said main control means, in said main operation display

Art Unit: 2833

area, and for demonstrating the moon image consistent with the age of the moon in said moon image display area, further comprising a moon age calendar for storage of the age of the moon and timepiece means for timing the current date and time; said display control means acquiring the age of the moon consistent with the current date and time from said moon age calendar, see col. 7, lines 5-8 of the US equivalent patent 6449219, further comprising communication control means "Transceiver" for establishing connection to an external network; said display control means acquiring the age of the moon from said external network through said communication control means.

3. With respect to claim 4, Hepp et al disclose main operating means "Display" for performing an specified operation consistent with the operation of the apparatus (the display of moon phase), and control means "CPU" for controlling the operation of the main operating means in keeping with the age of the moon (change of display of moon phase).

4. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vit W. Miska whose telephone number is 571-272-2108. The examiner can normally be reached on M-F 9-5:30.
